Ventyx LinkOne
for Asset Management

Ventyx LinkOne for Asset Management

Always find the right part. Right away.

Ventyx LinkOne is a graphical content delivery solution that provides correct and timely part information to a large and geographically dispersed network of dealers and operators.

The Industry Challenges

The problem facing operators is that they frequently receive maintenance manuals and updates for various components from multiple manufacturers and other suppliers each year, with many of them being outdated nearly as soon as they are printed. This has seen maintenance staff spending nearly 2 hours per day searching for correct parts information.

This problem has instigated the global transition from paper documentation to an easy to use, drill down graphical model available in digital form for PCs, networks and Internet users.

The Solution

Ventyx LinkOne is software for creating graphical parts catalogs that helps find the right part, the first time, every time. A world leader in graphical content management and distribution, Ventyx LinkOne has the unmatched power to link graphics with parts lists and rich text to easily produce electronic catalogs and graphical maintenance manuals.

Ventyx LinkOne has overcome many of the challenges that operators and maintenance staff face each and every day.

Being able to identify parts or equipment faster and more accurately saves equipment downtime and improves maintenance efficiency; providing improved business processes and productivity. A critical benefit of Ventyx LinkOne is that it cuts down the time it takes for operators to find the information they need to maintain equipment, resulting in reductions in maintenance times, downtimes for equipment and instances of recurring faults due to improper maintenance.

Ventyx LinkOne takes existing content and compiles it in a way that allows users to drill down into a complex assembly. Whether it is an earthmover, nuclear power plant, locomotive or engine, users can graphically traverse the entire assembly down to a single bolt in seconds, in order to obtain the correct part number.

Additionally, procedural documentation, instructional videos, updates and safety warnings can be attached at a location where service and maintenance personnel will be looking for them. Ventyx LinkOne can leverage any information you have, whether it is paper or electronic. Ventyx LinkOne is truly the ultimate step in content delivery.

The Benefits

Ventyx LinkOne connects graphics with text, so that at the click of a mouse you can not only see the item you want, but also any information associated with it, such as service instructions, ordering advice, safety instructions or parts lists.

In addition, Ventyx LinkOne allows operators to:

- Perform fast and effective maintenance of critical assets.
- Reduce down-time by providing accurate, up-to-date installation and service information.
- Reduce costs associated with excess stock by helping refine the ordering process for selling and sourcing of parts.
- Minimize costs associated with maintaining and updating service documentation via graphical search and displays of equipment and diagrams.

About Ventyx LinkOne

Ventyx LinkOne's superior publishing, distribution and viewing system makes all forms of electronic parts and service information available at the touch of a key via the Internet, intranet, or CD. This includes:

- Parts catalogs
- Repair manuals
- Operating and commissioning instructions
- Maintenance and repair procedures
- Visual operational aids, such as video clips
- Product alerts and safety bulletins
- Product updates and notices

Ventyx LinkOne's flexibility comes from:

Continual Updates

Ventyx LinkOne can regularly check for content updates over the Internet to maintain the latest information at all times.

Warnings and pop-up notes

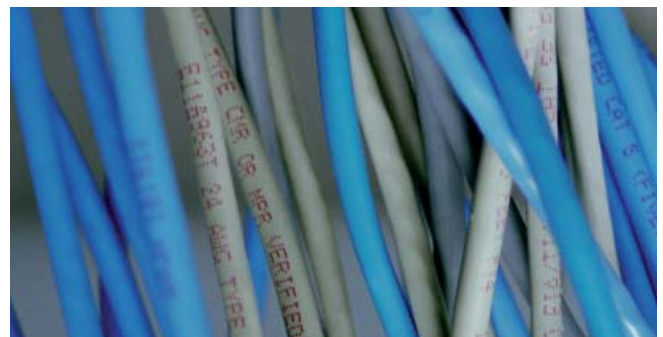

Ventyx LinkOne links graphics with up-to-date information, design changes, safety advice and warnings where necessary, within documentation.

Ventyx LinkOne speaks your language

Multi-national operation? No problems. Ventyx LinkOne speaks your language ... English, Dutch, French, German, Italian, Japanese, Spanish and many others, and has partners worldwide who can provide local support.

Publish Once, View Anywhere

Ventyx LinkOne content is only produced once but can be utilized, either via the browser interface Ventyx LinkOne WebView, or with the PC application Ventyx LinkOne WinView, allowing maximum reuse of the published content.

About Ventyx

Ventyx, an ABB company, is the world's leading supplier of enterprise software and services for essential industries such as energy, mining, public infrastructure and transportation. Ventyx solutions bridge the gap between information technologies (IT) and operational technologies (OT), enabling clients to make faster, better-informed decisions in both daily operations and long-term planning strategies. Some of the world's largest private and public enterprises rely on Ventyx solutions to minimize risk, enhance operational and financial performance, and execute the right strategies for the future. .
