

Ventyx Mobility

Ventyx Mobile Inspector

Ventyx Mobile Inspector provides your field-based workers with a simple and effective mobile application for collecting and managing data relating to all physical assets.

Asset management where it happens

Mobilizing your inspection process improves asset management by driving productivity, efficiency and cost control. For asset intensive businesses, with field workers deployed to maintain production-critical equipment, asset failure is not an option. Real-time onsite inspections are crucial to ensure continuous uptime and avoid asset failure that can cost millions of dollars in downtime and damages and catastrophically harm workers, local communities, or the environment.

Optimizing asset inspections

Ventyx Mobile Inspector streamlines and automates asset inspections by eliminating double-handling and paperwork, improving asset data collection and accuracy, and maximizing the efficiency and effectiveness of the inspection process. The solution further transforms asset inspection by allowing you to take advantage of a wide range of technology such as RFID, GIS, GPS and camera together with specialized asset management applications.

Complete, end-to-end asset management

Ventyx Mobile Inspector provides your field-based workers with a simple and effective mobile application for collecting and managing data relating to all physical assets. Offering more than efficient data collection, Ventyx delivers an inspections solution that embodies a best practice approach to managing physical assets. This gives you the insight and power to promptly act on information. Ventyx's purposebuilt inspections and defects solution turns data into meaningful information to initiate corrective action and to measure critical asset management KPIs.

Benefits for your business

- **Increased productivity.** Reduce the cost per inspection and decrease administrative tasks such as form and data entry to get more done in less time.
- **Reduced maintenance costs.** Switch from reactive to proactive and preventative maintenance with real-time inspection data.
- **Accurate and timely data.** Eliminate the costly

errors and inefficiencies of data double entry and lost paperwork. Standardise inspection and data capture processes.

- **Information flow.** Provide up-to-date information direct to field staff, eliminating out-of-date printed materials.
- **Enhanced health and safety.** Consistent procedures for field workers reduce occupational health, safety and environmental risks.
- **Rapid return on investment.** Requiring no integration, the solution is up and running fast to measurably reduce costs, improve productivity and deliver a rapid ROI.
- **Improved asset performance.** Full visibility of asset

status increases uptime and reduces the risk of failure.

- **Timely reporting.** Provide management with enhanced visibility of inspection work and generate KPI reporting.
- **Audit transparency.** Improve the review of information from the field and enable auditing.

Ventyx Mobile Inspector is an end-to-end field enablement solution that can help your enterprise reduce risk, improve compliance and increase overall business productivity.

The optimal workflow for an asset inspection

VENTYX ™
AN ABB COMPANY

www.ventyx.com

Ventyx, an ABB company, is the world's leading supplier of enterprise software and services for essential industries such as energy, mining, public infrastructure and transportation. Ventyx solutions bridge the gap between information technologies (IT) and operational technologies (OT), enabling clients to make faster, better-informed decisions in both daily operations and long-term planning strategies.

Some of the world's largest private and public enterprises rely on Ventyx solutions to minimize risk, enhance operational and financial performance, and execute the right strategies for the future.
